SUMMARY

I'm a backend developer and a Computer Science Engineering student at Thapar University, Patiala, India. My passion lies in building robust and efficient backend systems that power web applications. With a strong focus on performance, scalability, and clean code, I enjoy solving complex problems and optimizing the core logic that drives the functionality of modern websites.

PROJECTS

Thaparmegle

[Project Link](#)

- In this project , i have made an robust system where random users get conneted to each other and can chat with each other. It is a clone of the popular chatting platform Omegle. User Can even video chat with the quality of the video being adjusted according to the internet speed.
